Q90 Title of Study: COVID-19 Outbreak Behavior Experimental Simulation Game and Survey: Accounting for the Heterogeneity of Human Behavior to Prevent Infection Spread Due to Pro-Environmental Attitudes and Behaviors Principal Investigators (PI): Christopher Koliba and Scott C. Merrill Funder: Gund Institute for Environment, University of Vermont

**Introduction** You are being invited to take part in this research study about how people make decisions. You must be 18 years of age or older to participate. This study is being conducted by Scott Merrill, a Research Assistant Professor in the Plant and Soil Science Department at the University of Vermont **Purpose** We plan to study how and why people comply with social distancing and other public health measures during an active pandemic. **Study Procedures** If you take part in the study, you will be asked to take part in an experimental economics and behavioral theory study that will be run as a simulated game and/or survey. You will be asked to respond to a series of questions or scenarios that will be framed around different conditions associated with COVID-19, including different risk information. Surveys and Games will be run on computers. Computer games will simulate participation in everyday activities like going to the grocery store or park. Your participation in the survey and/or experimental game is expected to last approximately ½ hour. **Benefits** There are no substantial benefits to you from the research. By learning more about people's decision-making, we hope that the research will benefit society by increasing our understanding how individual behavior will impact health, economic status and management policy. **Risks** The risk for participating in this study is minimal. The information being collected will be coded to protect your identity and the potential risk for an accidental breach of confidentiality. You have no greater risk from the study than you would from doing a similar amount of routine paperwork in a similar setting. **Costs** There will be no costs to you for participation in this research study, other than your time.

**Compensation** Compensation is directed by Amazon Mechanical Turks **Confidentiality** All information collected about you during the course of this study will be stored without any identifiers. No one will be able to match you to your answers. All research information will be kept in a confidential form at the University of Vermont. The results of this study may eventually be published, but your confidentiality will be maintained. All participants are asked to keep their responses to all parts of the experiment confidential. **Voluntary Participation/Withdrawal** Taking part in this study is voluntary. You may discontinue your participation in this study at any time. You may choose not to take part in this study, or if you decide to take part, you can change your mind at any time during the game or before submitting the post-game survey and your data will be discarded.

**Questions** You may contact Dr. Scott Merrill or Dr. Chris Koliba, the Investigators in charge of this study, at 802-656-0711 or [scmerril@uvm.edu](mailto:scmerril@uvm.edu) for more information about this study. If you have questions or concerns about your rights as a research participant, then you may contact the Director of the Research Protections Office at (802) 656-5040. It is recommended you print this information sheet for your records before continuing.

Q58

In this section, we are interested in your beliefs about humans and the environment.

-----

Q68 Listed below are statements about the relationship between humans and the environment. For each one, please indicate whether you strongly agree, agree, neither agree nor disagree, disagree, or strongly disagree.

	strongly agree (1)	agree (2)	neither agree nor disagree (3)	disagree (4)	strongly disagree (5)
We are approaching the limit of the number of people the earth can support (1)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Humans have the right to modify the natural environment to suit their needs (2)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
When humans interfere with nature it often produces disastrous consequences (3)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Human ingenuity will ensure that we do NOT make the earth unlivable (4)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Humans are severely abusing the environment (5)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
The earth has plenty of natural resources if we just learn how to develop them	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

(6)					
Plants and animals have as much right as humans to exist (7)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
The balance of nature is strong enough to cope with the impacts of modern industrial nations (8)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Despite our special abilities humans are still subject to the laws of nature (9)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
The so-called "ecological crisis" facing humankind has been greatly exaggerated (10)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
The earth is like a spaceship with very limited room and resources (11)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Humans were meant to rule over the rest of nature (12)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
The balance of nature is very delicate and easily upset (13)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Humans will eventually learn enough about how nature works to be able to control it (14)

If things continue on their present course, we will soon experience a major ecological catastrophe (15)

In this section, you will have another chance to earn additional money.

You will be presented with two different lotteries. Lottery A and Lottery B will have different payoffs with different odds. To have a chance to earn additional money, you will choose between lottery A and lottery B.

You will make 10 different choices between lotteries.

One of these choices will be randomly drawn. For that lottery choice, one of the payoffs will be randomly drawn according to the probabilities given in the lottery. You will be paid the amount drawn in addition to your previous earnings in this survey.

This additional payment will be issued to you as a bonus from Amazon Mechanical Turk after completion of the survey.
